Education

B.Tech - computer science

G Madegowda Institute Of Technology • Mandya, Karnataka

06/2024

I achieved a top 100 ranking in my university with an 8.4 CGPA.

12th - science

New Expert PU college • Ramanagara, Karnataka

04/2020

I achieved distinction with grade of 85%

Certificates

- Google IT automation using python -> coursera
- SQL for Database -> coursera
- core java -> simplilearn
- Full stack python -> udemy

Projects

1. **Online food ordering website** (NOV,2023 - Feb,2023) I designed and developed an online food ordering website, implementing key features such as food searching, credit card payment processing, real-time delivery status tracking, and complete CRUD operations.
2. **Heart disease prediction system** (SEP,2023 - JAN,2024) I created a machine learning and deep learning project that predicts heart disease by analyzing eye images and utilizing health indicators like blood pressure, SpO2, age, and BMI, demonstrating my expertise in both web development and data science.

Hackathon

I participated in a national-level ethical hacking hackathon hosted at MIT College, Mysore, showcasing my dedication to cybersecurity and problem-solving skills.
